EMPLOYEES APP – REPORTING

PROJECT SUMMARY

REPORT DATE	PROJECT NAME	PREPARED BY
2022-05-15	Employees App 1.0	Byron Tomkinson

PROJECT SUMMARY

An app that allows you to view, sort and filter employee and business information.

SCOPE

BRAND	StarLink Group
MARKET	South Africa, Nigeria
API	YES
MOBILE	NO
Frontend	YES
Backend	YES

CHANGE HISTORY

VERSION	DATE	DESCRIPTION
1.0	2022-05-15	First version ENG

CONTACT PERSONS

SIDE	SCOPE	NAME AND SURNAME	E-MAIL
Client	Developer	Andrew Smith	andrew.smith@supchain.com
Client	Business	Catherine Bond	catherine.bond@supchain.com
Software House	Analysis	Jack Long	Jack.long@softwarehouse.com

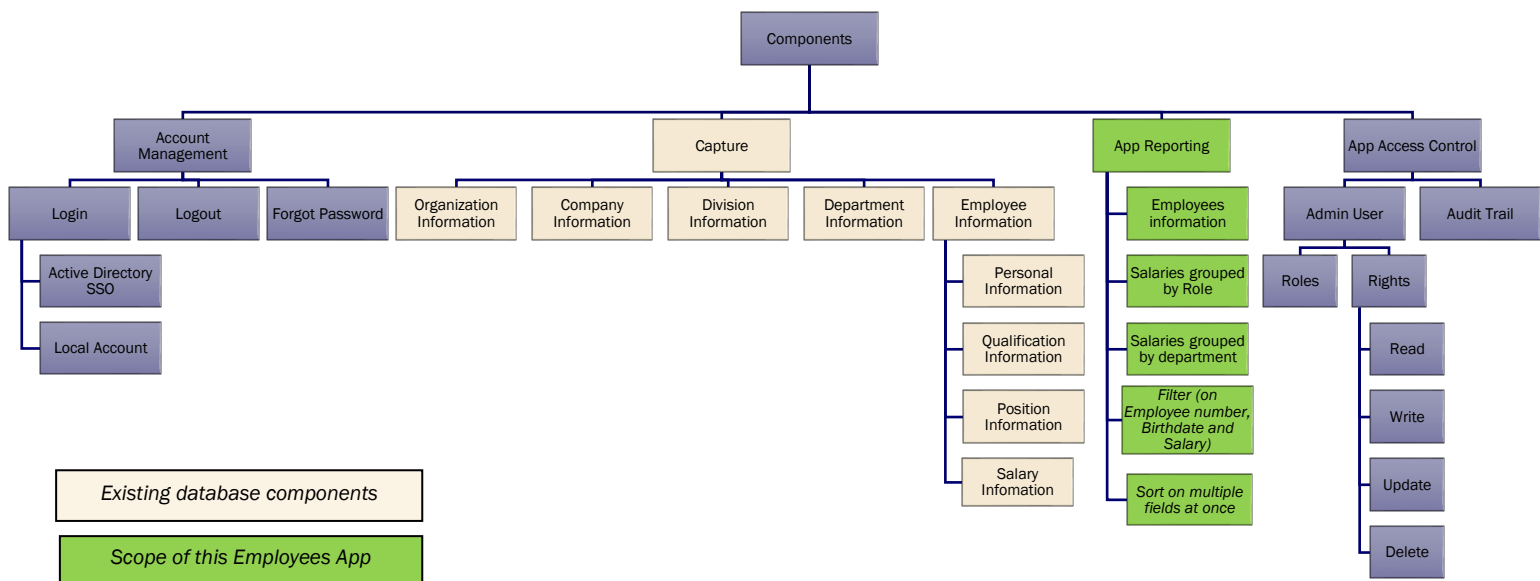

1. INTRODUCTION

1.1 Business purpose

This project is a module part of a larger project and was introduced in order to easily view and analyze employee information. In this module, employees and other business-related information are displayed with filtering and sorting made effortless.

1.2 Description of dependencies

This module is part of a larger project which includes the App Management, Capture and App Access Control.

1.3 Definitions

User – the person that works with the Employees App.

Filter – generating a list based on certain specific criteria.

Sort – ordering a list.

Organogram - graphical representation of an organization's structure.

2. GRAPICAL DESIGN

2.1 Home screen

StarLink Employees

Display Organogram  1

Display Salaries grouped by Role  2

Display Salaries grouped by Department  3

Filter Employees based on a column in a range 6

Column 4 From 5 To 7 Filter 8 Remove filter

Sort and order Employees on multiple columns 11

Column 10 Order by 12 Sort 13 Remove sort

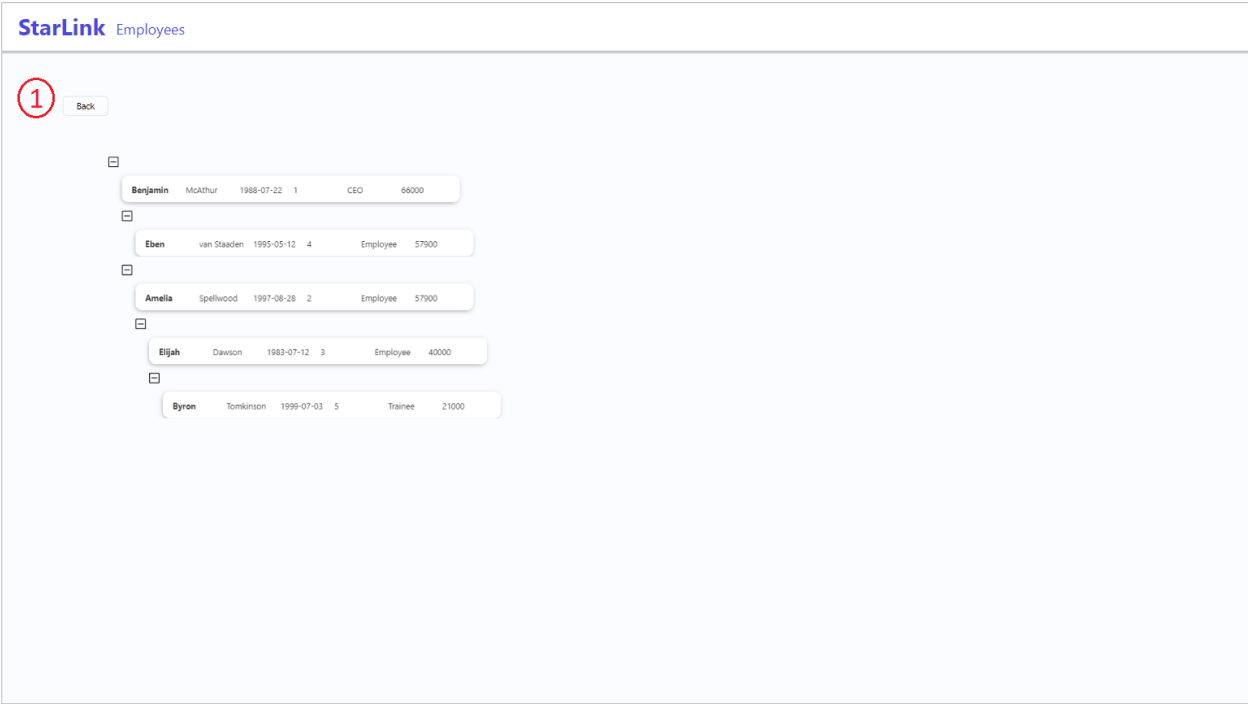

Search 9

Reset Employees List 14

Name	Surname	Birthdate	Employee No	Marital Status	Postal Code	Address 1	Address 2	Contact No	Country	Salary	Reporting line	Role Name	Dep Name	Div Name	Comp Name	Org Name	Qualification
Byron	Tomkinson	1999-07-03	5	Single	1692	88 Moan street	Midrand	0768796473	South Africa	21000	3	Trainee	Infrastructure	IT	Starlink SA	Starlink Group	Bachelors
Benjamin	McArthur	1988-07-22	1	Married	1456	12 Folsbery	Pretoria	0835268546	South Africa	66000		CEO	Infrastructure	IT	Starlink SA	Starlink Group	PhD
Eben	van Staaden	1995-05-12	4	Single	1456	14 Jobbly crescent	Pretoria	0831234533	South Africa	57900	1	Employee	Accounts	Finance	Starlink SA	Starlink Group	Bachelors
Amelia	Spellwood	1997-08-28	2	Married	1965	32 Avenue	Fairland	0764238472	South Africa	57900	1	Employee	Infrastructure	IT	Starlink SA	Starlink Group	Masters
Elijah	Dawson	1983-07-12	3	Married	1492	9 Moonwalk street	Pretoria	0834158243	South Africa	40000	2	Employee	Infrastructure	IT	Starlink SA	Starlink Group	Masters

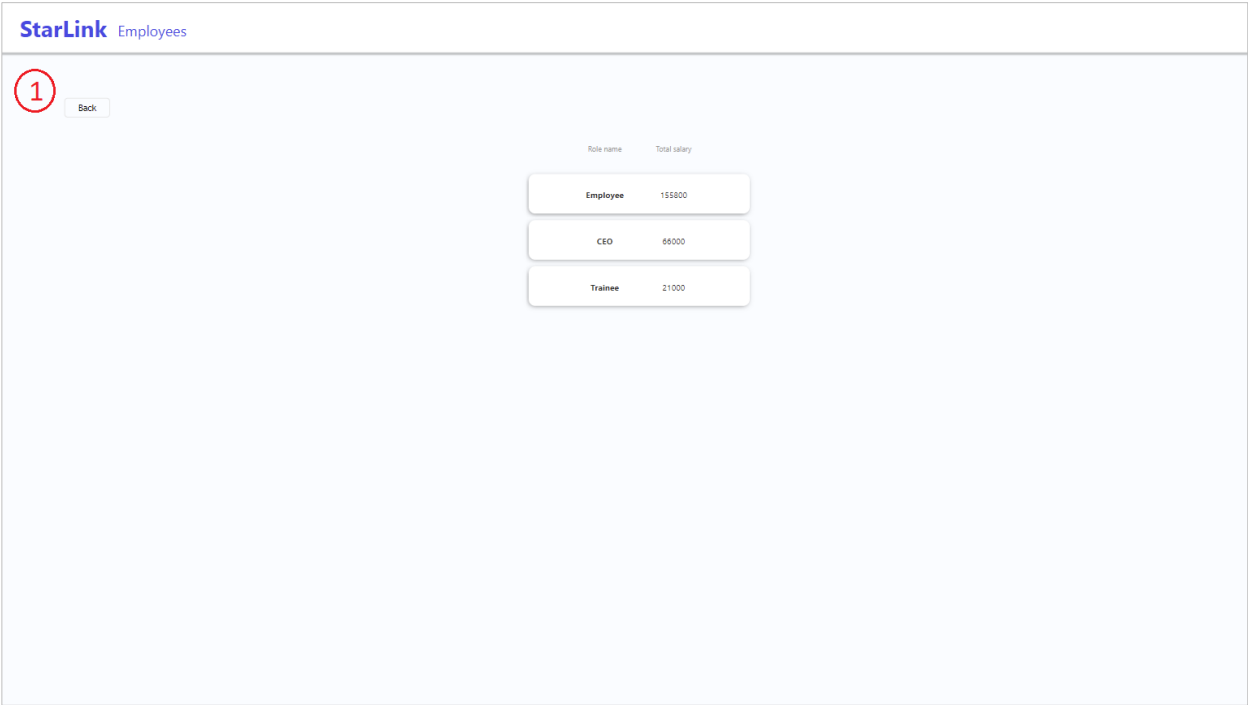

- 2.1.1 1 - Go to organogram
- 2.1.2 2 - Display list of employee salaries grouped per role
- 2.1.3 3 - Display list of employee salaries grouped per department
- 2.1.4 4 - Filter "column" field
- 2.1.5 5 - Filter "from" field
- 2.1.6 6 - Filter "to" field
- 2.1.7 7 - Activate filter
- 2.1.8 8 - Remove filter
- 2.1.9 9 - Generic search for employees list
- 2.1.10 10 - Sort "column" field
- 2.1.11 11 - Sort "order by" field
- 2.1.12 12 - Activate sort
- 2.1.13 13 - Remove sort
- 2.1.14 14 - Refresh the employees list

2.2 Organogram screen

2.2.1 1 – Back to home screen button

2.3 Salaries grouped per Role screen

2.3.1 1 – Back to home screen button

2.4 Salaries grouped per Department screen

The screenshot shows the 'StarLink Employees' interface. In the top left corner, there is a 'Back' button highlighted with a red circle and the number 1. The main content area displays a table with two columns: 'Department name' and 'Total salary'. The table contains two rows: 'Infrastructure' with a total salary of 184900, and 'Accounts' with a total salary of 57900.

Department name	Total salary
Infrastructure	184900
Accounts	57900

2.4.1 1 – Back to home screen button

3. DESCRIPTION OF FORM FIELDS

3.1 Filter fields

- 3.1.1 **Column field** – selects the column on which filtering is done
- 3.1.2 **From field** – select the “from” range value (If birthdate is selected as the column field: Input must be in date format (YYYY-MM-DD))
- 3.1.3 **To field** – select the “to” range value (Can be empty if the From field is not empty. If birthdate is selected as the column field: Input must be in date format (YYYY-MM-DD))

3.2 Sort fields

- 3.2.1 **Column field** – select the column on which sorting is done (if multiple columns are selected, sorting will be done in the order in which selection was done e.g., if role_name is selected first and total_salary is selected second, the list will sort according to role first and then salary - in the case where a user wants to see the highest earning salaries in a specific role).
- 3.2.2 **Order field** – select the order in which the list will be sorted (Ascending or Descending).

4. USER STORIES AND TESTING SCENARIOS

4.1 User stories

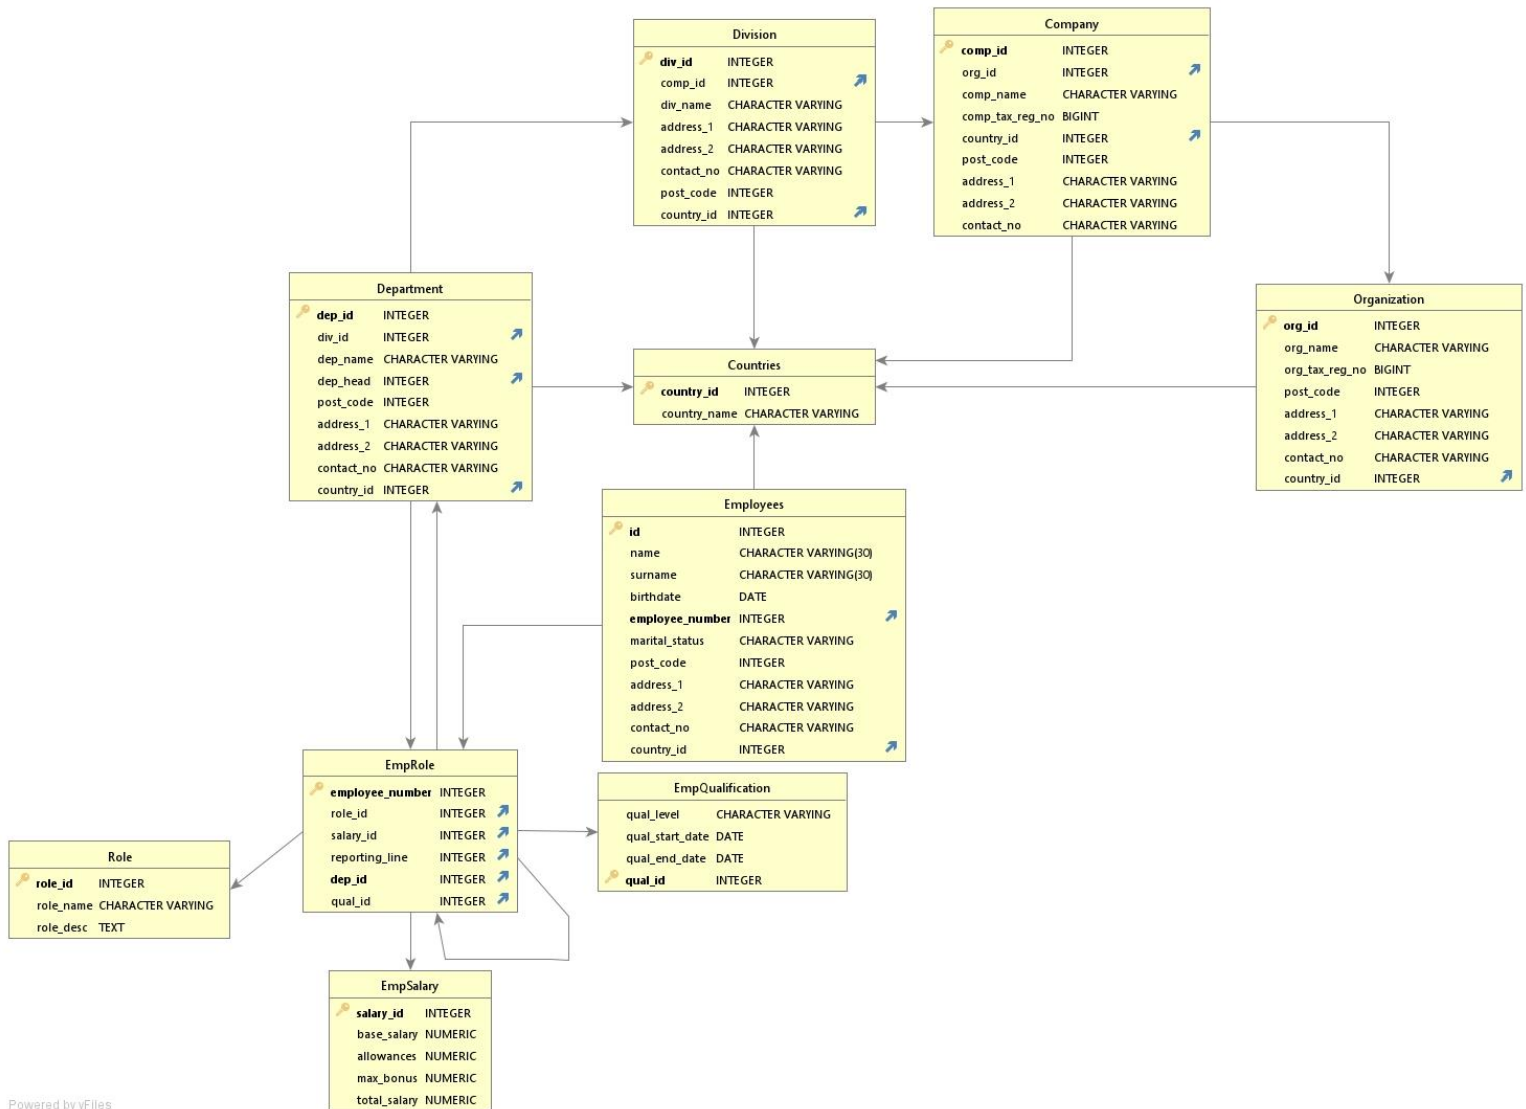

Functionality	Title	User story	Acceptance criteria
Searching employees	Searching for employee's contact details	As a user I would like to search an employee's surname in order to obtain their contact details so I can get in contact with them.	Any text input data is accepted for the search
	Searching for employee's salary	As a user I would like to search the employee by name in order to find out what their current salary is.	Any text input data is accepted for the search
Filtering employees	Filtering all employees who were born after a certain year	As a user I would like to create a list of all users born after 1997 so I can see how many Gen Z employees we have.	"From" field must have input as a proper date in the format (YYYY - MM - DD)
	Filtering all employees with a salary above a certain value	As a user I would like to list all employees with a salary above R50 000.	"From" field must have a number as input.
	Filtering employees to obtain an employee with a certain employee number	As a user I would like to obtain an employee's records with the employee number 3.	"From" field must have a number as input.
Sorting employees	Sorting employees based on highest earnings, grouped per role	As a user I would like to sort the employees showing the highest earning employee in the "Employees" role.	Both fields are drop down select options, therefore, no acceptance criteria.
	Sorting employees based on highest earnings per qualification level	As a user I would like to sort the employees showing the highest earning employee in the "Bachelors" qualification.	Both fields are drop down select options, therefore, no acceptance criteria.
Display	Display organogram	As a user I would like to see who each employee reports to in an organized structure.	None
	Display salaries per role	As a user I would like to see how much money is being spent in the "Trainee" role.	None
	Display salaries per department	As a user I would like to see how much money is being spent in the infrastructure department.	None

4.2 Testing scenarios for filter

Column field	From field	To field	Output	Message
Birthdate	1995-07-01	-	OK	-
Birthdate	1995-07-01	12	ERROR	Please enter a valid "to" date
Birthdate	32fr	1995-02-12	ERROR	Please enter a valid "from" date
Employee number	5	5	OK	-
Employee number	fd	5	ERROR	Please enter a valid "from" number
Salary	50000	-	OK	-
Salary	50000	100000	OK	-
Salary	-	40000	ERROR	Please enter a valid "from" number

5. DATABASE

The database was designed using in Postgres 14 and an entity relationship diagram (ERD) of the enterprise database can be found in figure 1.

7. SECURITY

The security protocols are to be designed in following modules with user access control methods

8. ARCHITECTURE

3-tier architecture

The Employees App is deployed on a 3-tier architecture using the following technologies: ReactJS, ExpressJS, NodeJS and PostgreSQL.

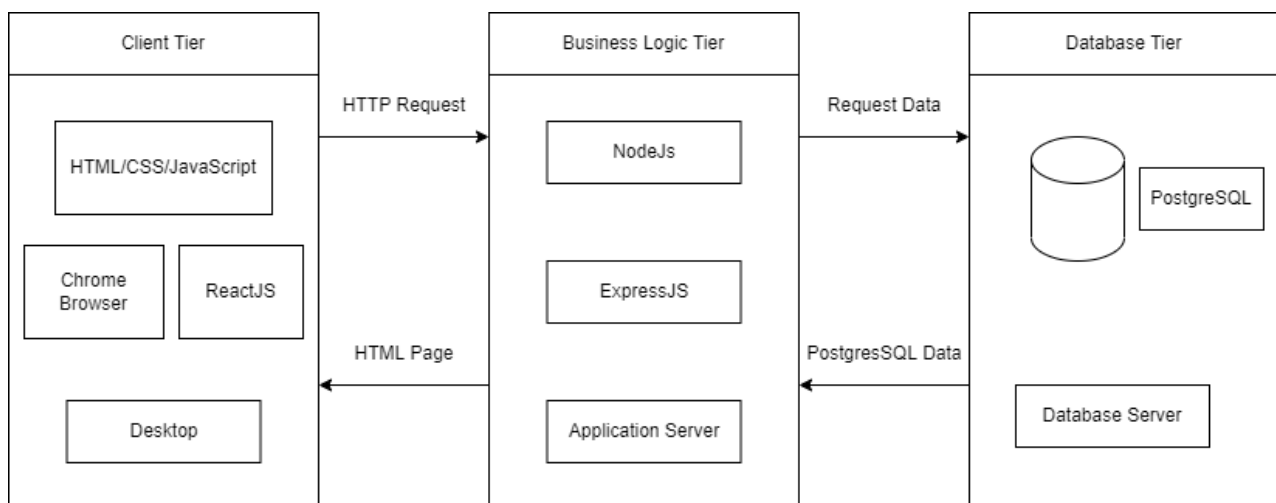

Figure 2: Architecture diagram of the 3-tier architecture

9. USE CASE DIAGRAMS

The use case diagram in figure 3 shows how the user can perform the actions “View employees”, “Sort employees”, “Filter employees”, “View Salary group by Role” and “View Salary grouped by Department”. These actions are handed through the database which is controlled by the data base administrator (DB admin)

Figure 3: Use case diagram
