EMPLOYEES APP – REPORTING
INSTALLATION GUIDE

INSTALLING

Prerequisites: In order to install this Employees App, the user needs to have Node, npm and PosgreSQL installed.

1. In the project root directory open command prompt or windows PowerShell and type in the following command to install all required node modules:

   ```
   npm install
   ```

2. In the same directory type in the following command to start the server:

   ```
   node index.js
   ```

   The server should now be running:

   ```
   App running on port 3001.
   ```

3. In the client folder type in the following command to install all the required node modules:

   ```
   npm install
   ```

4. To start the client run the command:

   ```
   npm start
   ```

The client and server should now be running and working together
